

**RAIL****CONTRACT:** Selhurst Traincare Depot.**CONTRACT PERIOD:** 22 Weeks**CLIENT:** AMEC Capital Projects Ltd  
Amec House  
Heron Drive  
Langley, Slough  
Berkshire  
SL3 8XP**VALUE:** £2.5 million**CONTRACT DESCRIPTION:**

The contract incorporated three packages. The first package was the demolition and removal of the existing concrete structure and bulk excavation of the underlying sub-soil. The second element of the works was the supply and placing of drainage within the existing building. The main portion of the works was the construction of the reinforced concrete structure. The concrete was to a very high quality finish with the majority and the structures forming the completed viewed finish. The location of the works within the existing shed did not allow for the use of a tower crane due to the roof remaining on the building throughout our programme. The building only had one access and one egress point. This made the works more difficult but was overcome by meticulous planning and sequencing of the works.
